

STOP ((5G))
**Stay connected
but protected**

European Citizens' Initiative - ECI

Coordinator Pernille Schriver

www.signstop5g.eu

The Reason for this ECI

**No politicians or authorities have listened
Nobody took responsibility**

Therefore:

Networking on a European level in order to have the power to influence EU laws.
And in this way also influence our national laws.

No Health or Environmental Assessments

Failure to Protect all Living Beings!

Environmental impact

- Mining - destruction of natural habitats
- Conflict minerals
- Energy consumption
- Electronic waste
- Pollution

Effects of Lithium mining by the Lichu River in Kangding, Garzê, eastern Tibet

Censorship

STOP ((5G))
Stay connected
but protected

European Citizens' Initiative
March 01, 2022 - March 01, 2023
www.SignStop5G.eu

1984

FREEDOM IS CENSORSHIP

One year of
citizens' democratic
participation

One year of trouble:

- Blocked on Facebook
- Blocked on YouTube
- Blocked on LinkedIn
- Blocked in fundraising

The Success of the Stop 5G ECI

- EU wide collaboration
- Worldwide support and networking
- Public education and awareness
- Scientific networking
- Europeans for Safe Connection

REDUCE YOUR EXPOSURE

 Your Wi-Fi router is the main source of microwaves inside your house 

Turn your router's Wi-Fi off or use wired-only internet router ★★★★★
and use cables for your devices

- for your mobile use a plug-in-cable (USB-C to RJ45 Ethernet)
- for your notebook use an Internet/Ethernet cable

Turn your router off when you don't need it and always at night ★★

Lower your router's microwave-emission ★

Change the router settings:

- Set the transmit power **down to 20%**
- Change the signal interval (beacon), set it to one second or less. Beacons (signals) will then be sent only every second instead of 10 times per second.

Use special program to set your router:

- TL-WR841N-Tweaker firefox extension allows setting the transmit power of your TP-Link WR841N router **down to 3%**

 www.SignStop5G.eu

Scientific networking

- **Scientific report produced in a Danish – Swedish collaboration**
- ***“Critique of SCHEER Opinion Report on Health Risks from Radiofrequency Radiation”***

3 topics from the conclusion:

- A predetermined outcome favouring industry interests by the selection of pro industry experts
- Recommends adoption of ICNIRP 2020 dangerous limits that put entire EU population at serious risks
- Excludes the majority of field experts who agree the public must be better protected

Read the full report here:

www.signstop5g.eu/en/news/disappointing-scheer-opinion-report

Critique of SCHEER Opinion Report on Health Risks from Radiofrequency Radiation

A review of the EU expert group and opinion of August 2022 on the need of a revision of the maximum exposure limits for radiation from wireless communications

A report prepared by

The Council for Safe Telecommunications (Denmark)
and
The Swedish Radiation Protection Foundation

Copenhagen and Stockholm, January 25th, 2023

Apply our 23 Proposals to protect...

1. All living beings 10 proposals
2. Our environment 8 proposals
3. Our privacy, security and freedom 5 proposals

Thank you for listening

Review > Rev Environ Health. 2022 Sep 22. doi: 10.1515/reveh-2022-0106. Online ahead of print.

The European Union prioritises economics over health in the rollout of radiofrequency technologies

ACTION AGAINST 5G

URGENT CALL TO ACTION

The Government has failed its duty to inform the public about the risks of wireless radiation and 5G

We need your support at this critical point in our case

Join a peaceful presence outside the court as we hold the Government to account by Judicial Review

Royal Courts of Justice

Strand, London WC2A 2LL

Mon 6 & Tue 7 Feb (1½ days) 9.30 a.m. prompt

See <https://t.me/actionagainst5G> for transport options

The judge on arrival must feel our strength of opposition!

<https://actionagainst5g.org>

We are doing what authorities should have done!

REDUCE YOUR EXPOSURE

Your Wi-Fi router is the main source of microwaves inside your house

Turn your router's Wi-Fi off or use wired-only internet router

and use cables for your devices

- for your mobile use a plug-in-cable (USB-C to RJ45 Ethernet)
- for your notebook use an Internet/Ethernet cable

Turn your router off when you don't need it and always at night

Lower your router's microwave-emission

Change the router settings:

- Set the transmit power **down to 20%**
- Change the signal interval (beacon), set it to one second or less. Beacons (signals) will then be sent only every second instead of 10 times per second.

Use special program to set your router:

- TL-WR841N-Tweaker firefox extension allows setting the transmit power of your TP-Link WR841N router **down to 3%**

Protect all life from radio frequency and microwave radiation

1. Protect yourself and your family against **all health and biological effects** by minimising the exposure to RF EMF.
2. Look for scientific evidence and educate yourself.
3. Do not settle for the convenient assurance that the authorities care. Demand protection based on the best available scientific data, not lobby.
4. Ask for exposure guidelines that have been developed by scientists with biomedical expertise and who are **free from conflicts of interest**.
5. Demand that all biologically effective parameters of RF EMF are evaluated when testing wireless devices, antennas, and their operation.
6. Replace wireless connections with **cables**. Do so immediately in your home. Demand it in hospitals, kindergartens, schools, retirement homes, all public buildings.
7. Inform others about the dangers associated with wireless connections and how to minimize them (e.g. by using cables)
8. Ask your community to provide **low/no radiation zones**.
9. Demand that you are not exposed to RF EMF, it is your right to protect your health and bio-integrity.
10. Based on the **precautionary principle**, ask for the protection of **nature, animals and plants**.

Protect the environment from all impacts of 5G and digitalization

11. Be involved in the local development proceedings in your municipality. Ask your government agencies to review all telecommunication **projects** for environmental impact.
12. Reduce the massive electricity consumption caused by digital communication technology by prioritizing wired and low energy solutions.
13. Before buying a new device, think about the huge amounts of waste from electrical and electronic equipment (WEEE) and the environmental impact of mining for resources (for producing new devices). Do you really need to buy this new device?
14. Save energy of all your connected devices - turn off all your wireless functions when you do not use them actively.
15. Remember that manmade RF EMF has various harmful parameters and consider all of them as a **pollutant of your space**.
16. Demand monitoring of all biological harmful parameters of RF EMF in your community.
17. Call for a stop for 5G satellites worldwide until the environmental impacts are resolved.
18. Do not use satellite internet.

Safeguard your privacy, security and freedom

19. Be aware of risk of surveillance and data misuse of 5G, IoT & IoB (Internet of Things & Internet of Bodies).
20. Do not upload personal and medical data on the internet (even though it is a personal account) for better protection against the increasing cybercrime.
21. Do not tolerate discrimination and digital rights violations.
22. Demand that your data are not processed by automated procedures (by AI).
23. Help organizing public debates on digital innovations.
